

JND eDISCOVERY ACHIEVES RELATIVITYONE SILVER PARTNER STATUS

JND ONE OF THREE GLOBAL SERVICE PROVIDERS TO MEET ELITE PARTNERSHIP LEVEL REQUIREMENTS

MINNEAPOLIS, May 14, 2019 -- [JND eDiscovery](#), a division of [JND Legal Administration](#) providing innovative solutions, litigation support and managed eDiscovery services to private and public sector clients, today announced its advancement from RelativityOne Certified Partner to RelativityOne Silver Partner with eDiscovery software provider, Relativity. A RelativityOne Certified Partner since 2017, JND is now one of only three service providers in the world to satisfy the performance and volume-based criteria set forth by Relativity for its new and most prestigious certified partner level.

“Our partnership with Relativity has been integral to our ascent in the industry,” said Scott Lombard, Senior Vice President of JND eDiscovery. “JND is proud to be one of three distinguished service providers that meets the stringent standards required to be a RelativityOne Silver Partner.”

Relativity’s Certified Partner Program is designed to showcase companies’ levels of technical expertise and commitment to delivering business value to their clients. To achieve RelativityOne Silver Partner status, companies must meet regional requirements for hosting volumes and user base size, maintain precise ratios of Relativity Certifications held to volume of data hosted, and demonstrate innovation by publishing at least one value-added application to the Relativity App Hub.

“Topflight technology and exceptional client services are the core of our eDiscovery business,” commented Ben Sexton, Vice President of JND eDiscovery. “Being one of three companies to earn this partnership status is a testament to our unique ability to deliver on these commitments.”

JND’s promotion to RelativityOne Silver Partner status is a testament to the company’s continued growth and influence in the cloud eDiscovery space. One of the first service providers to become RelativityOne Certified and offer clients a fully cloud-based eDiscovery solution, JND operates one of the largest RelativityOne environments in the world. JND clients have access to the company’s proprietary software solutions, including LayerCake™, a patent-pending application used by case teams to prioritize and accelerate large-scale document review.
